PROJECT EXPERIENCE

MeMusic — Music Streaming Web Application

- Me Music consists of music from artists all over the world using spotify's WebAPI. Users will have access to Search Artist and access the playlist of their favorite music.
- MeMusic was developed using Javascript, HTML/CSS, JSON, Spotify's WebAPI and Adobe XD for wireframing.
- MeMusic: <https://memusic.netlify.com/> <https://github.com/ktown5422>

WORK EXPERIENCE

Ramp Agent — Southwest Airlines, St. Louis, MO

April 2018 - Present

- Handle all aspects of loading, stowing and unloading baggage, cargo airmail, air freight, ballast and company materials according to a predetermined plan received either electronically or manually from an Operations Agent.

Baggage Handler/Assistant — Huntleigh, St. Louis, MO

May 2017 - March 2018

- Responsible for servicing the elderly and the disabled through the airport
- Directed all passengers through the T.S.A security process, took them to the restroom if needed, and or to grab some food at a restaurant.
- After taking care of passenger needs, I directed them to their correct gate and inform the gate agent about my passenger.

Pedaler — Food Pedaler, St. Louis, MO

November 2015 - June 2016

- Primary duties were to deliver food as a Food Pedaler to customers in the St. Louis metropolitan area.
- Began learning HTML/CSS, by working with and shadowing a senior level developer.
